**FIG-256**  
SLOW SPEED BOARD

**FIG-257**  
RESUME SPEED BOARD

Temporary speed boards must be used and installed in accordance with the M. of W. Book of Rules.

**SPEED BOARD PLATES**  
*Reduce Speed Board (FIG-255)* - The board plate shall be 125-6061-T6 aluminum. The face of the plate shall be covered with N° 2271 wide angle Yellow Flat-Top Scotchlite with N° 605 Black Scotchlite numerals. The Reduce Speed Board shall consist of a set of four separate numeral plates reading 10, 15, 30 and 50.

*Slow Speed Board (FIG-256)* - The board plate shall be 125-6061-T6 aluminum. The face of the plate shall be covered with N° 2271 wide angle Yellow Flat-Top Scotchlite with N° 605 Black Scotchlite letter "S".

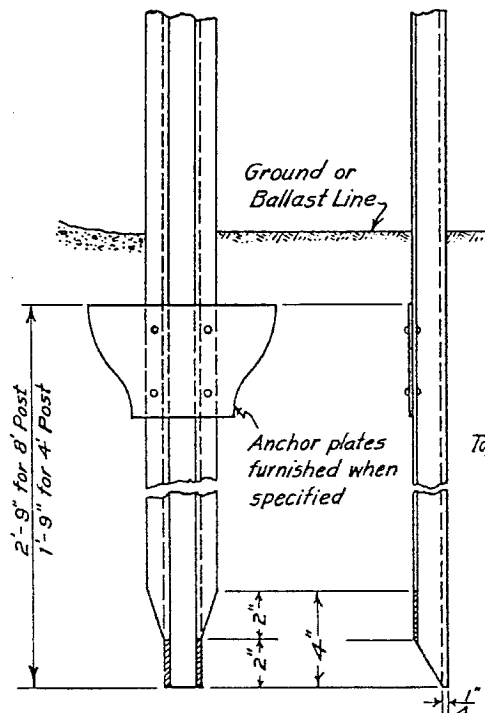

*Resume Speed Board (FIG-257)* - The board plate shall be 125-6061-T6 aluminum. The face of the plate shall be covered with N° 2277 wide angle Green Flat-Top Scotchlite with N° 2270 wide angle Silver Flat-Top Scotchlite letter "R".

**Posts**  
The posts shall be made of steel weighing 260 lbs. per lineal foot, painted with a primer and finish coats of metallic aluminum paint, baked on post separately. Holes to be punched and end of post pointed as shown by details on plan. The length of post shall be 4'-0" or 8'-0" and will be equipped with an anchor plate when specified.

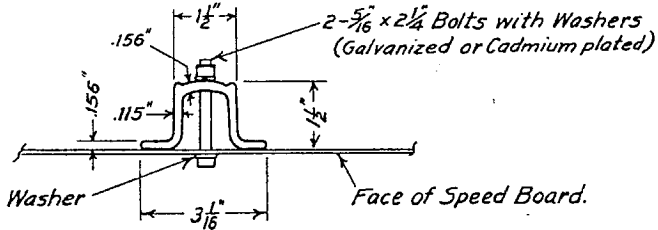

**Ordering**  
When ordering speed boards specify as follows:  
*Reduce Speed Plates* - Specify speed numeral desired on plate and quantity of each type required.  
*Slow Speed Plate* - Specify quantity of plates required.  
*Resume Speed Plate* - Specify quantity of plates required.  
*Posts* - Specify length (4' or 8') with or without anchor plate, and quantity required. The posts to be furnished with necessary bolts and washers.
